

ContiTech keeps your customers moving.

When it comes to form, fit, and function, ContiTech brand automotive belts are unrivaled. And with Original Equipment approvals for many American, Asian, and European auto manufacturers, and a strong commitment to product development, it's no wonder ContiTech is a global industry leader.

Here's what makes ContiTech the right choice:

- **ContiTech Timing Belts** utilize the latest in design and material technology, ensuring a quiet and maintenance-free experience. Our program includes 265+ belts, covering a wide range of early to late model applications.
- **ContiTech Timing Belt Kits** contain an OE-quality timing belt plus all required tensioners or idlers. By replacing the timing belt and its matching parts at the same time, you'll provide extra engine reliability as well as greater safety for your customers. And with 190+ kits available, we offer the best coverage available in the market.
- **ContiTech "Pro Series" Timing Kits** include a water pump, a hydraulic tensioner (when applicable), and every part needed to do a complete timing belt/water pump change. CRP Automotive currently offers 98 kits covering over 300 vehicle applications for import and domestic makes.
- **ContiTech Serpentine Belts** include a complete program of belts for driving generators, fans, water pumps, AC compressors, and power steering. A lower profile design provides less noise and cooler running. And with service life intervals equal to or greater than the parts they are designed to replace, our serpentine belts are truly worry-free.
