

Welcome to our world.

USA | CANADA | MEXICO

A new headquarters worthy of the lines we carry.

In 2009, after over 45 years in the same location, CRP Industries designed and built a new office and warehouse facility that will serve the needs of our suppliers and customers well into the future.

Located in Cranbury, New Jersey, the new space is located less than 2 miles (3.2 km) from one of New Jersey's main commercial arteries — and just a short drive from our old Carteret building.

Our new headquarters includes 93,000 square feet (8,640 meters<sup>2</sup>) of warehouse as well as 15,000 square feet (1,394 meters<sup>2</sup>) of Class A office space spread out over 2 floors. Virtually every aspect of the building was designed to optimize our sales and support teams; with a premium placed on enhanced ergonomics, efficiency, and inter-team communication.

**We hope you enjoyed your tour of the new CRP Headquarters and welcome any questions or comments you have.**

### The Office Area

The moment you walk in the front door of 35 Commerce Drive, you'll be able to see and feel the difference.

Progressive thinking informs the design of every one of the facility's 15,000 square feet spread out over two floors — from the corporate accent colors on the walls; to the Herman Miller furniture systems; to the wealth of specialty function rooms like a kitchen, exercise room, and twice the number of conference rooms as we had at our previous location.

If you were to take a walk through the office after normal business hours, you'd be able to see the motion-sensor controlled lighting system that contributes to reduced energy costs. Even our new computer servers were selected for their energy efficiency.

Our sensitivity to minimizing CRP's impact on the environment continues with our complete recycling program: every bit of packing or office material that can be recycled will be recycled.

### The Warehouse Area

The warehouse facility at our new Cranbury headquarters represents a dramatic leap forward in capacity and efficiency. For starters, there are roughly three times the number of pallet positions. All in a space that offers a clear ceiling of 36 feet (11 meters) — a height that required us to purchase new forklifts with enough reach to stock/pick from our highest rack positions.

Step inside the warehouse and you are struck by how bright it feels. That's due to a combination of white-painted walls and a plethora of windows that let in natural light. All of which adds up to fewer order picking errors, as well as a more pleasant atmosphere.

And while you may not ever be lucky enough to venture onto the roof, rest assured that it has been reinforced sufficiently to support a large array of solar panels. What's more, the roof itself is painted white to reflect light, which aids in keeping the warehouse cool.

Walking around the warehouse floor, you'll notice that we've dedicated a section close to the 14 shipping and receiving doors just for our automotive fluid lines. In combination to special "speed-rack" shelving, this strategic position minimizes put-away time and improves order pick efficiency. These racks also feature an enhanced fire suppression system.

Just how much more efficient is our new warehouse? We estimate that one picker can now handle an order in 24 hours that would have previously taken 2 people up to 48 hours.

### Additional Warehouse Advantages:

- Variable height racking on selected aisles accommodates European-spec pallets and allows an additional inventory level
- Production shop has been designed to support production flow continuously through the department — with raw materials close at hand
- Wireless connections throughout the warehouse allow for RFD (Radio Frequency Device) tags/tracking in all receiving and picking operations
- Receiving department has an expanded staging area for receipt of inbound containers

### Departments on 1st Floor:

- Operations
- Order Fulfillment
- Human Resources
- Marketing
- Purchasing
- Product Development
- Reception & Building Management

### Departments on 2nd Floor:

- Sales
- Accounting/Finance
- Information Technology
- Administration
